COMPANY OVERVIEW

EAST PROWESS LIMITED is a dynamic Tanzanian Engineering and Construction company with extensive experience in inbuilding and civil construction works.

The company is fully equipped with modern machinery and a team of highly skilled engineers, architects, and technical experts capable of delivering large-scale engineering and construction projects.

With years of proven expertise, EAST PROWESS LIMITED has successfully undertaken numerous complex building and infrastructure projects across Tanzania.

Our strong fleet of equipment combined with experienced staff enables us to execute projects efficiently while maintaining the highest standards of quality and safety.

We specialize in various engineering works including structural engineering, civil works, road construction, and large commercial and residential developments.

EAST PROWESS LIMITED is committed to innovation, precision, and timely project delivery, making us a trusted partner in Tanzania's growing construction industry.

Backed by robust project management systems and a dedication to excellence, we continue to set new benchmarks in engineering and construction works.

The company remains focused on delivering superior results that exceed client expectations in every project we undertake.

COMPANY HISTORY

- EAST PROWESS LIMITED was founded in 2018 in Dar es Salaam, Tanzania, with a vision to deliver excellence in engineering and construction works.
- Starting as a small team of passionate engineers and builders, the company quickly gained recognition for its quality workmanship and timely project delivery in residential and commercial building construction.
- Over the years, EAST PROWESS LIMITED has grown significantly, expanding its service portfolio to include large-scale civil engineering works, infrastructure development, and complex construction projects across Tanzania.
- Today, the company stands as a trusted name in the industry, equipped with modern machinery and a highly skilled workforce capable of handling multi-million shilling projects.
- Our journey has been marked by consistent growth, successful project completions, and strong client relationships built on professionalism, integrity, and innovation.
- From humble beginnings to becoming a formidable player in Tanzania's construction sector, EAST PROWESS LIMITED continues to evolve with the changing demands of the industry while upholding the highest standards of quality and safety.
- With a solid track record and ambitious plans for the future, the company remains committed to contributing to Tanzania's infrastructure development and economic growth through world-class engineering and construction solutions.
- Looking ahead to 2026 and beyond, EAST PROWESS LIMITED is poised for even greater achievements, driven by a commitment to innovation and sustainable development.

VISION, MISSION & VALUES

VISION

A regional market leader in provision of civil engineering and building construction services.

MISSION

We aim to be among elite engineering construction companies in East Africa providing efficient, affordable, sustainable, cost-effective services using high level of technology and quality.

VALUES

We believe in maintaining the highest standard of professionalism, integrity, creativity, positive attitude, and ethical engineering while offering prompt and lasting solutions that stand the test of time.

LEADERSHIP TEAM

Mr. Isaias Kabali

Managing Director

A visionary leader with over 15 years of experience in leadership and strategic management. Holding an MBA and PMP certification, he drives the company with exceptional business acumen and team inspiration.

Eng. Upendo Bitaliho

Chief Engineer

A dynamic Civil Engineer with over 5 years of experience managing complex engineering projects and field teams. Known for her solution-oriented and aggressive approach to delivering high-quality results.

Mr. Andrew Kamuzora

Chief Financial Officer

With over 15 years in financial management, he holds a Master's in Finance and CFA certification. Expert in strategic financial planning, risk management, and optimizing resources for large construction projects.
